Key words

Radiant | Passionate | Expressive | Candid | Popular | Career & Status

Emma, your Day Master is **Byeong Fire (丙)**, pictured as **the bright midday sun**. People born on a Byeong day are bright and full of energy, and wherever they go, people notice them.

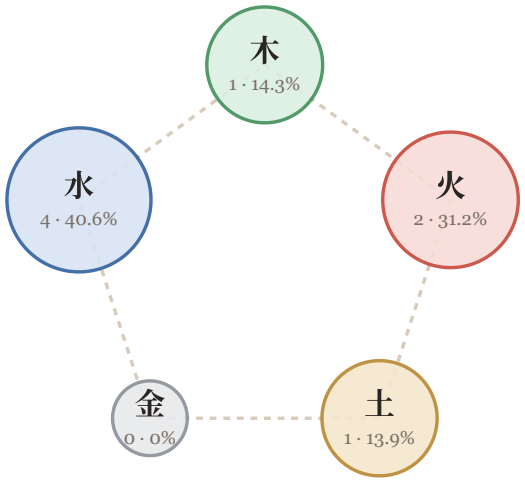

The strongest energy in your chart is **Career & Status (Gwanseong)**. Your natural power shows most clearly in matters of career, honor, rules, spouse (for women).

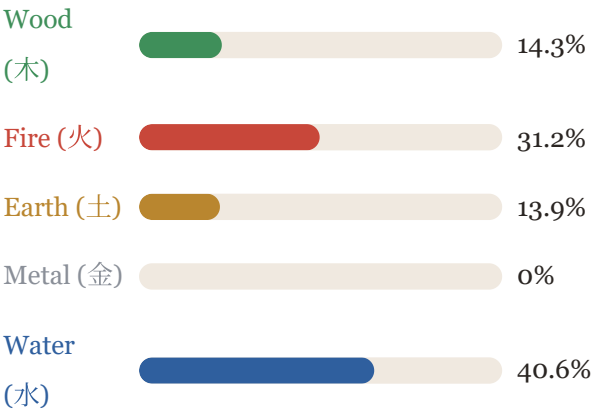

Your chart has no **Metal** at all, and its strongest element is **Water**. Your luck opens wide when **Wood**, the element that fills your gap, flows in.

Right now you are in the **Eul-Yu Major Luck** cycle (ten years from age 27.7). A Mentor period brings help and recognition. Your mind settles and learning goes well.

08

The Five Elements

Circle size and bars include hidden stems and the weight of each position. The count is the number of visible characters among your eight.

Wood feeds Fire, Fire makes Earth (ash), Earth bears Metal, Metal carries Water (condensation), and Water nourishes Wood. This is the generating cycle (sang-saeng).

Wood breaks up Earth, Earth dams Water, Water puts out Fire, Fire melts Metal, and Metal cuts Wood. This is the controlling cycle (sang-geuk).

Wood (木) · balanced

Wood is the energy of growth that pushes upward like new shoots in spring. It stands for kindness, beginnings, planning, education, and development.

You have a balanced amount of Wood, so you can use this energy's qualities naturally without strain.

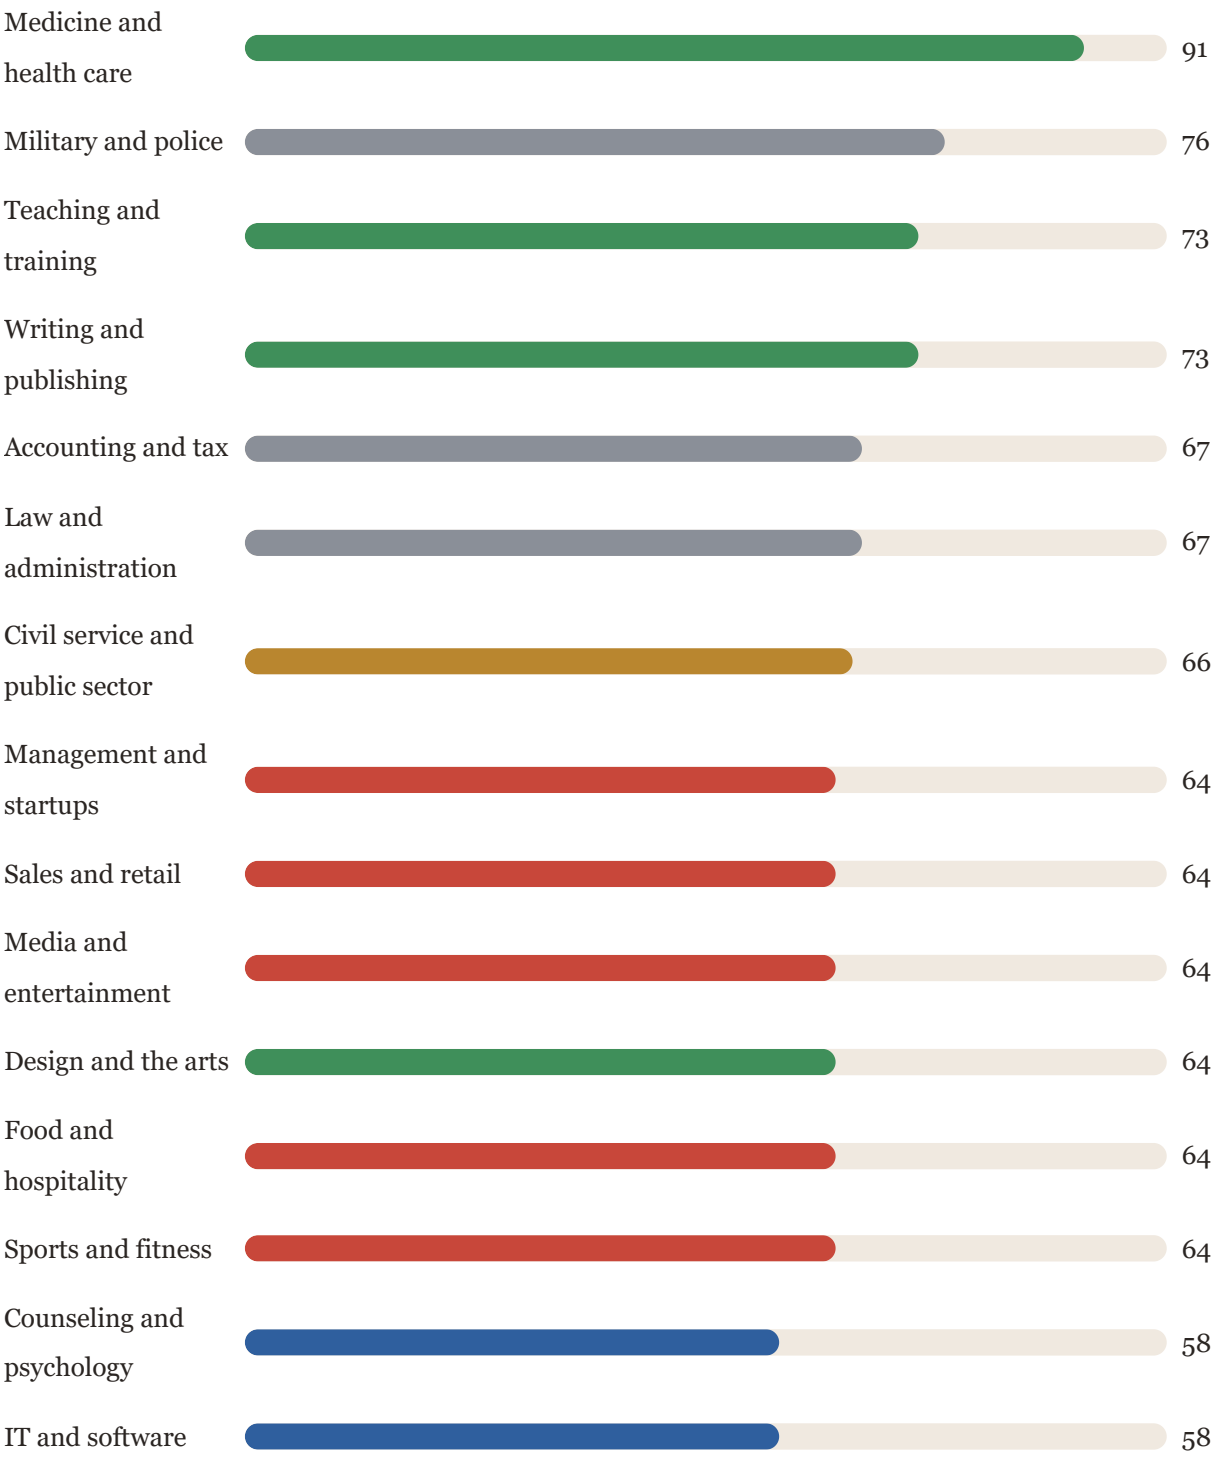

Fire (火) · abundant

Fire is the energy of passion that blazes upward and spreads in every direction like summer sunlight. It stands for courtesy, expression, enthusiasm, honor, and expansion.

With a lot of Fire, you can be impatient and emotionally up and down. Words may run ahead of thought, and excitement comes easily. Look after your heart, blood pressure, and sleep.

Career fit chart

Based on the Ten Gods in your chart and your Useful Element, we scored how well twenty career fields fit you. The higher the score, the easier it is to use your natural energy there.

Your lifetime luck at a glance

The period to handle with the most care is **the Gi-Chuk cycle from age 68**. Watch for slips of the tongue, contract or legal issues, and conflict with authority. Knowing it in advance means you can prepare and pass through it well.

2026 in focus

丙午 2026 · Byeong-O

★★★★☆ Good

2026 brings Companion (Bigyeon) in the heavenly stem and Rival (Geopjae) in the earthly branch.

The Companion is energy identical to yours in element and polarity. It stands shoulder to shoulder with you: friends, colleagues, siblings. It also represents your independence and sense of self.

The Rival shares your element but with opposite polarity. Its classical name means "the one who takes wealth," so it stands for competitors, rivals, and the will to win.

By area of life

Area	Flow
Overall	A Companion period brings like-minded people into your life. Your independence grows and you may want to start something on your own. A Rival period brings competition and change. You feel like taking risks, and people and money move in and out in large amounts.
Money	Income may rise, but so do the people and causes you share it with. Be careful with joint ventures, loans to friends, and guarantees. Spending grows and money slips away easily. Avoid speculation, gambling-style investments, and big guarantees.
Work and career	The urge to go independent, start a business, or change jobs grows. Competitors appear, but they push your skills higher. Win the competition and you leap ahead; overreach and you can lose big. Take calculated risks only.
Love and home	You may meet someone who feels like a friend, or argue with a partner about who leads. Men may need to give way more often at home. A rival in love or a love triangle may appear. Guard the trust in your relationship.
Watch out for	Watch for ego battles and money disputes with siblings or friends. Beware of impulsive decisions and handing your money to other people to manage.
